

An aerial photograph of a large industrial building under construction. A long crane arm extends from the roof of the building towards the sky. The building has a flat roof with a grid of steel reinforcement. In the background, there are other industrial buildings, a body of water, and a distant shoreline under a cloudy sky.

Building Better Together

LOCAL EXPERTS WORKING AS ONE TEAM

We are a group of independently run businesses, providing the people, the knowledge, and the skills to deliver the highest quality results in our chosen trade.

We are also a collaborative entity, providing greater levels of cooperation and communication throughout a project/build process.

Hunter Construction Group is seven disciplines **working together** as one.

Hunter Construction Group was born from the desire to create a suite of trades working together, creating a cohesive and complementary construction process.

In order to provide our clients the best possible service, we set out to minimise, or even eliminate, the result of non-optimal supply chains and reliance on 3rd parties. Being that there is a real cost borne from delays, defects, non-conformance and quality issues, we set out to create a level of control over the critical components that can affect our ability to deliver on time and to the highest quality.

Whether it's a core supplier or a complimentary trade, our focus has always been to build the right mix of products and capabilities to offer the best possible result for our clients. We stand by our reputation on this front.

HUNTER STRUCTURAL STEEL

Hunter Structural Steel is a leading specialist in designing and fabricating quality steel structures, as well as a range of fabrication services, drafting and 3D modelling.

HUNTER READYMIXED CONCRETE

Hunter Readymixed Concrete is a leading supplier of high-quality concrete, dedicated to keeping building and construction projects on track across the region.

HUNTER CIVILAB

Hunter Civilab is a trusted Geotechnical Engineering, Environmental Services and Construction Materials Testing laboratory, dedicated to supporting your project.

Our Group

HUNTER WINDOWS

Hunter Windows specialise in large scale and customised windows and door solutions for your commercial, architectural or residential project.

HUNTER PRECAST

Hunter Precast is a leading supplier of high-quality, precision-made concrete panels. Our years of experience ensure a safe and efficient build for your project.

HUNTER INSTALL

Hunter Install specialise in steel and precast panel erection. As the final stage of the supply process, we ensure the clients get the best in finished product.

HUNTER QUARRIES

Hunter Quarries has been providing quality quarry materials, specialising in hard rock aggregates for concrete and asphalt markets and rock and roadbase materials for civil and rail applications, throughout the Newcastle and Hunter Valley region and beyond for over twenty years.

CAPABILITIES

Steel Structures

- Industrial
- Commercial
- High Rise/Multi-level
- Sheds
- Mezzanines
- Design and Engineering

Steel Fabrication

- Custom Designs
- Balustrades
- Gates
- Stair Cases
- Rural Supplies
- Gantries

Additional Services

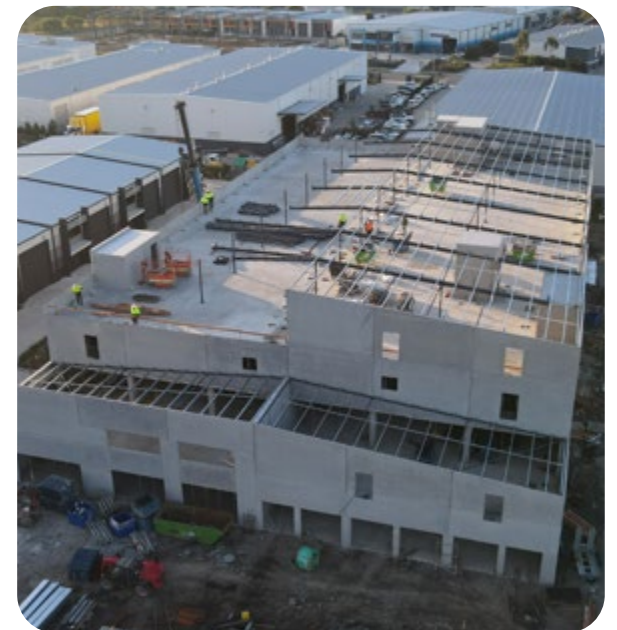

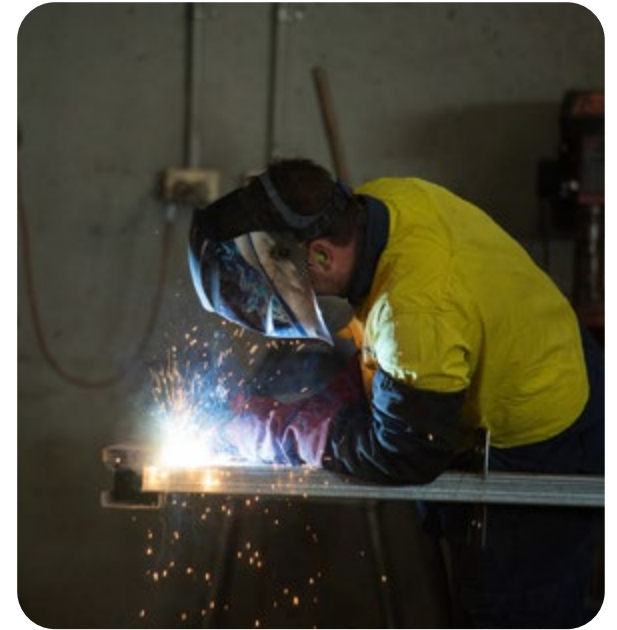

- Design
- Drafting
- 3D Modelling
- Sand Blasting
- Painting
- Steel Erection

Hunter Structural Steel

Hunter Structural Steel is a specialist in the design and fabrication of quality steel structures, as well as custom steel fabrication and repairs.

Talk to us about any steel fabrication or steel structure project.

Hunter Readymixed Concrete

Hunter Readymixed Concrete is a leading supplier of high-quality concrete, dedicated to keeping building and construction projects on track.

Special Class and Decorative Concrete experts.

- 34 Agitator Truck Fleet incl. eight 10-wheelers
- Truck capacity from 0.4 - 8.0 m3
- 4 locations across the region

Hunter Civilab was founded in 2003 as a construction materials testing laboratory, focusing on earthworks, quarry material and concrete testing.

Over the years we have added geotechnical engineering and environmental consulting services including site investigations for a range of industries. We offer timely expert assessments that provide a clear path for any civil, industrial, commercial or residential development. Our wide range of in-house capabilities allow us to provide a timely and cost effective service to our clients.

Hunter Civilab

SERVICES

Geotechnical Engineering

Geotechnical engineering uses principles of soil mechanics and rock mechanics to investigate subsurface conditions and materials.

Environmental Services

We provide a fast and reliable range of services to ensure the environmental compliance and sustainability of your project including environmental site assessments, soil classification and contaminated land management.

Geotechnical Drilling

Our trained and qualified drillers offer a range of services regarding geotechnical and environmental drilling and investigations.

MATERIALS TESTING

Soil Classification

Our team of experts conduct soil classification and testing in our NATA-approved laboratory on areas including site investigation and drilling, materials quality testing, insitu compliance testing and engineering reporting.

Earthworks Testing

We conduct efficient earthworks & pavement construction testings including quality assurance, slope stability, construction planning, subsurface drainage, pavements and surface tests.

Concrete, Grout and Mortar

Our team specialise in concrete testing, offering a range of services and test types, as well as project compliance testing to RMS & AS specifications.

Aggregate Testing

Comprehensive aggregate and quarried product testing, including project supply management, grading mix design and laboratory trials.

Hunter Windows

Hunter Windows specialise in large scale and customised windows and door solutions for your commercial, architectural or residential project.

Our expert team of window and door specialists are here to help. We happily provide estimates and advice on our wide range of products to ensure you get the most from your next project.

PRECAST CONCRETE RANGE

Cladding

- Non load bearing panels
- Dado walls
- Balustrades

Structural

- Facade panels
- Sandwich panels
- Columns and beams
- Retaining walls
- Lift and stair cores

Architectural

- Signage panels
- Decorative panels
- Curved panels
- Polished panels
- Coloured panels

Specialised

- Stair treads
- Interlocking blocks
- Custom product

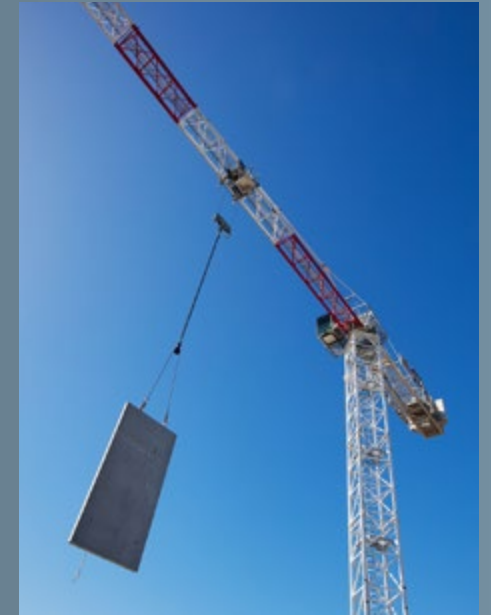

Hunter Install

At Hunter Install we are committed to the promise of quality that all Hunter Construction Group companies adhere to. As the final stage of the supply process, we ensure the clients get the absolute best in finished product.

Our team of precast and steel erection crews have experience on small builds right up to multi-level residential and commercial builds. Bringing over 20 years experience to every project, we are proven precast and structural steel installers, and our legacy is testament to that.

Hunter Quarries

We are committed to the successful supply and delivery of quality quarry products for the civil, construction and landscaping industries.

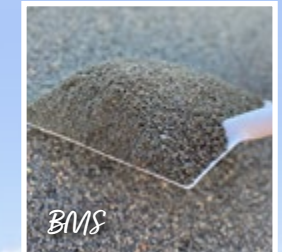

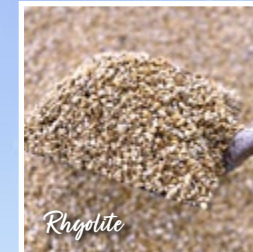

Hunter Quarries is proudly certified under the ISO International Standards for Quality Management Systems. We continually strive to improve our safety, environmental, and quality management.

SOME OF OUR KEY RANGE

Aggregates

- Asphalt aggregates
- Concrete aggregates
- Drainage aggregates
- Decorative aggregates

Specialty Rock

- ARTC rail ballast
- Gabion
- Armour rock

Base Material

- Road base
- Sub-base
- Select material
- Scalps, capping and fill material

Manufactured Sand

- Barmac manufactured sand (BMS)
- Cone manufactured sand (CMS)
- Barmac cone combination manufactured sand (BcCMS)
